

Complete Brava! 5.1 Installation Guide

Step 1 – Navigate to the Your PC area of the Expesite homepage and click on the Download link below.

The screenshot shows the Expesite homepage with the 'Your PC' menu item highlighted in red. Below the navigation bar, there is a 'Quick tour' section with a 'launch >' link. To the right, there is a video player showing a person typing on a keyboard. Below the video, there is a section titled 'What you need' with a list of download links. The 'Download' link for 'Brava! ActiveX Component' is circled in red.

What you need

Brava! Java Applet - To View most documents on Expesite
[Download](#)
[Click here for a step-by-step guide](#)

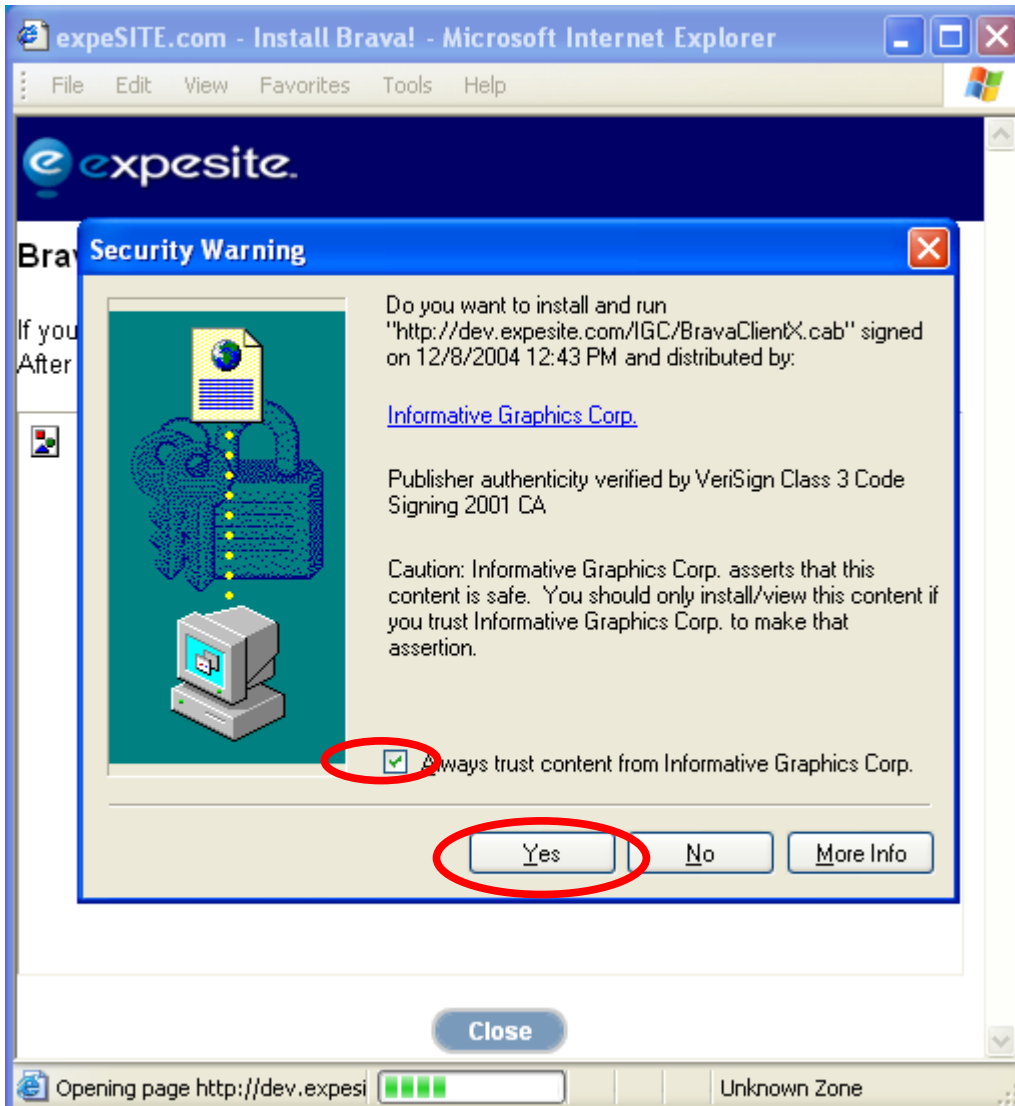

Adobe Acrobat Reader - To View some documents on Expesite
[Download](#)

Stuffit Expander - All downloaded files are delivered Zipped
[Download](#)

Brava! ActiveX Component - Download the new version of Brava! before the February 20th Release
[Download](#)
[Click here for a step-by-step guide](#)

Step 2 – Check the box below to always trust content from Informative Graphics. (You will not be prompted for updates in the future) Click YES.

If you do not get a prompt to install this ActiveX component, please contact your IT or IS department. You may not have permission to install this on your computer.

Step 3 – When the installation is complete, you should see the following picture.

Required Permissions

The Brava! Client is a signed ActiveX control. In order for an end-user to install the client control, their Internet Explorer browser needs to be configured to accept signed ActiveX controls, and must be enabled to run ActiveX controls. Select the "Custom Level..." option from the Internet Explorer Options,³ Security tab to view the various IE security settings.

The end-user must also have the appropriate permissions to download and install the control. By default, most versions of Windows come with the *Standard User* and *Restricted User* roles. A user assigned to a group with the "Standard User" permission set will be able to install the Brava! Client control, however, an end-user with just the "Restricted User" role will not.

To see what type of an account a user has:

1. From the Control Panel, double-click **Users and Passwords (User Accounts** in Windows XP).
2. Select the user account and click the **Properties** button.
3. In the Properties dialog, select the **Group Membership** tab for the user's group.

To allow an end-user to install the Brava Client ActiveX control, a couple of alternatives are:

- Set the end-user's Group Membership to one that has the appropriate rights (i.e. the Power User's Group). This is set from the **Group Membership** panel described in the preceding paragraph.
- A user with sufficient rights can install the control on the restricted user's machine. This can be accomplished by copying over the entire ClientInstallScript directory (located under the Brava! Client install directory) to the end-user's machine and then running the BravaClientInstall.bat script located in the copied directory. Once executed, an end-user who only has "Restricted User" rights will be able to execute the Brava! Client control. See the README.txt file in the ClientInstallScript directory for more information.
- A user with appropriate rights can log on to the end user's machine and hit a sample page that references the Brava! Client control. Once this has been successfully downloaded by this "power" user, the restricted user will be able to use the Brava! control on the machine.
